| <i>Reticle</i> | 4 |

GECO GOLD riflescopes

High zoom factors and outstanding optical performance are the characteristic features of the GECO Gold riflescopes. Flexible enough for practically any hunting situation and extremely unfavorable lighting, they deliver excellent performance specs for transmission, field of view and exit pupil. This is due to their use of multilayer coating and optic calculation. Besides the fine illuminated GECOdot, the company focused in particular on high adjustment travel and tool-less zeroing with an integrated GECOtrac target turret. The extremely compact design houses the highest quality materials and a built-in lens mount. The 10-year warranty is an expression of the outstanding quality and reliability.
