

SPOTTER XTREME

Long range spotter

The SpotterXtreme all-in-one hand held night vision system has been designed to complete the night hunting experience. Doing what no night vision monocular can do, the NiteSite SpotterXtreme allows the hunter to identify and advance on the prey without detection.

- 20x optical zoom
- Field of view 25°
- No ambient light required
- IR frequency 850nm
- Video output 3.5mm 4 pin jack
- Operational run time 5 hours
- 5 integral IR LEDs
- Water resistant
- Weight 1300g
- Built in rechargeable 3.5Ah battery
- Identification range 500 metres (550+ yards)*

NEW Scope mounted laser rangefinder

New for 2016, our fast, accurate scope mounted laser rangefinder conveniently attaches to any Viper, Wolf or Eagle system and provides all the range finding data you need quickly and accurately for targets up to 500m*.

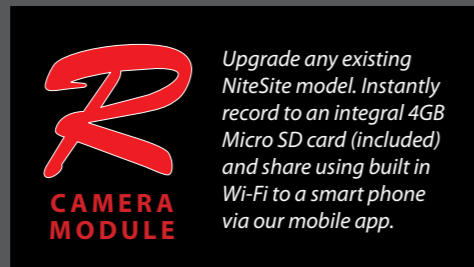

The rangefinder target is overlaid on your LCD viewing screen so you can not only see your prey in the dark, but also know exactly how far away it is, improving the accuracy and safety of your night hunting experience.

The rangefinder target is clearly visible on your viewing screen as a white dot, so you know the data it provides matches your intended target

NEW Recording camera module

A new recording camera module is now available, enabling those who don't want the full upgrade capabilities of the new RTEK system to benefit from the convenience of integral recording and Wi-Fi sharing.

NEW NiteSite accessories

Choose from a wide range of accessories to supplement your NiteSite set up and improve your night hunting capability. Latest additions include our new range of Lithium Ion rechargeable batteries.

CONVERT YOUR DAY SCOPE INTO A NIGHT SCOPE WITH NITESITE

*Depending on scope / NiteSite combination and prevailing weather conditions

Scope mounted infrared night vision systems by NiteSite

At NiteSite we design and manufacture patented infrared night vision (IRNV) products for hunting, security, and zero ambient light observation. We utilise infrared in a unique way to make our products more affordable, reliable and user friendly than traditional light amplification technologies. Our products deliver crisp, ultra-clear night vision, even in zero light conditions.

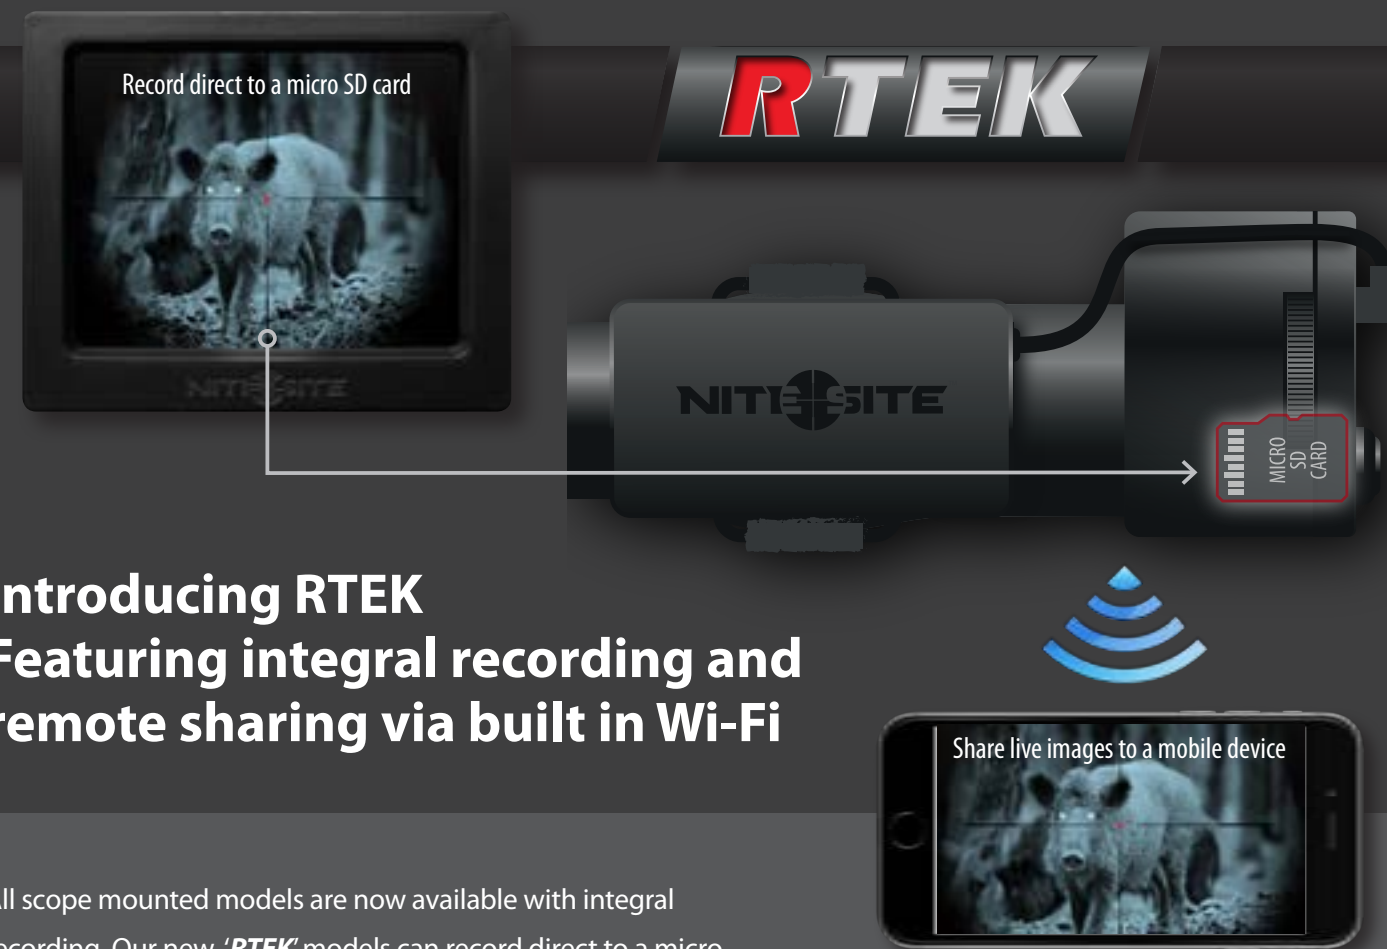

The true beauty of a NiteSite is that it converts your day scope (there's no need to remove it) into a powerful night vision system that is quick and simple to set up.

NiteSite continues the night vision revolution through a versatile product range designed to meet the requirements of all types of hunter; The VIPER for short range hunting, WOLF for medium range targets and the ultra powerful EAGLE for long range strikes.

Our scope mounted products are augmented by our hand held SpotterXtreme designed to complete the hunting and scouting experience.

If you want to hunt at night... it's got to be NiteSite.

Introducing RTEK Featuring integral recording and remote sharing via built in Wi-Fi

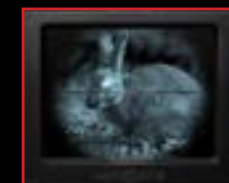

All scope mounted models are now available with integral recording. Our new 'RTEK' models can record direct to a micro SD card at the push of a button on the rear of the camera unit. Making it quicker and easier to record night hunting footage without the need for an external device and cable.

Wi-Fi connectivity enables video to be wirelessly uploaded or streamed live to a smart phone from any NiteSite 'RTEK' model via our mobile app available for iOS and Android.

- 640x480 VGA AVI format recording
- Remote viewing via iOS & Android app
- Integral recording to micro SD card - 4GB micro SD and adapter included
- Wi-Fi sharing via NitePlayer app
- Dimmable screen
- External focus
- New hexagonal shaped camera housing
- Heavy duty, waterproof case

How far do you need to see at night?

100m

300m

500m

Every hunter has different distance criteria, depending on hunting style, prey and fire power. Choose the NiteSite that best suits your individual needs.

Designed to be the most affordable, high quality night vision system on the market for short-range distances. The VIPER is perfect for the up-close and personal hunter.

Delivering high quality, clear night vision. The WOLF provides maximum versatility and huge advantage to the night hunter.

A night vision force to be reckoned with. Much like nature's eagle, this NiteSite will spot and identify quarry so far away it almost seems unfair.

Model shown WOLF - Medium Strike NiteSite

Every NiteSite features:

- Suitable for use with any rifle
- 60 second installation
- Ultra clear night vision
- No need to re-zero
- No ambient light required
- IR Frequency 850nm
- AV output 3.5mm 4 pin jack
- 3.5 inch display screen
- Water resistant
- Can be used both day and night
- Rechargeable Lithium Ion battery
- All-in-one night vision system

Anatomy of a NiteSite:

- A - IR illuminator module
- B - LCD viewing screen
