

GECO 8x56

Item no. 2403728

Both powerful and effective. The compact and lightweight design combined with the very large fields of view and the large exit pupil make spotting a relaxed activity. The high transmission values create bright and high-contrast images for hunting until nearly nightfall.

Properties

Length (mm)	192
Weight (g)	1200
Field of view (m/100)	129

GECO binoculars

The field glasses in the GECO line provide the perfect entry to the world of high-quality binoculars in unbeatable value for money. The slender and ergonomic design was combined with the use of high-quality materials. The housing is made entirely of magnesium. The scope delivers a large field of view, sharp edge definition, high transmission values and a great short focus thanks to ED glass, multilayer coating and an adjusted optic calculation. These models stand out from their competitors thanks to their robustness, low weight and optical performance. All products come with a tripod connection, a shoulder strap and a hard case.

GECO binoculars for hunting are available in 8x and 10x magnification.
